Watch as Dr. Walid Phares and Mosbah Ahdab tackle the root cause problems in Lebanon where you have a militia that operates as a state within a state, against UN Sec. Council Resolution 1559 that facilitates Iranian and Syrian control to topple the democratically elected Government and the Cedars Revolution quest for democratic freedom, independence and sovereignty.

Also, The Opposition in Lebanon clearly is using the destabilization in Lebanon (threats, intimidation bombings, intimidation assassinations, warnings etc....) as a tool to demand more power in the Government from the Majority. This is clearly not acceptable, especially in a true democracy.
