Phares on CR Radio: Lebanon's Army Must become a strategic force.

In his fifth radio address via the CR News Radio Program from Washington DC, Professor Walid Phares said Lebanese pressure groups and friends of Lebanon in the United States and worldwide are working on getting a real strategic support to the Lebanese Armed Forces so that Lebanon's Army would become a strategic force in Lebanon, able to reign in all militias, confront the terrorists and control all borders." He added: "however if weapons are sent to Lebanon while Hezbollah controls the defense decisions inside the Lebanese cabinet, this will lead to problems we've seen in the past. First, US and international support must deal with that issue. any support to the Lebanese Army must be part of a strategy which will enable this Army to cover all of the country, starting with counter terrorism capacity."
