A source close to the leadership of a local organization in Yemen affiliated with Al-Qaeda said that Al-Qaeda followers will implement a major operation against the United States, which is much bigger than the 11-September and probably will change the world politically and economically.

The source said that this operation will be a response to Washington's and Western countries rejections of the truce offered by al Qaeda for Western countries led by the United States. Orders are given by Bin Laden himself, the implementation of this operation is a matter of time, depends on well preparations and opportunity.
