The World Council for the Cedar Revolution and the international community support the call for the implementation of International United Nations Resolution 1559

The World Council for the Cedar Revolution and the international community support the call for the implementation of International Resolution 1559

Washington, June 6, 2020

Today, Lebanon is going through one of the main stations during its recent history, almost similar to the Cedar Revolution, which showed the extent of the Lebanese fight against the Syrian occupation today and their meeting to demand its end, as a natural reaction to terrorism and prostitution, and how many mouths and marketing of this occupation.

Today, after fifteen and fifteen years have passed since this revolution, which did not take advantage of the wrapping of the Lebanese around to completely expel the agents and tools of the occupier, which did not enter the country in a fabricated war and then a counter-attack on democracy and the return of the occupation with a new old garment that is called Hezbollah, which by its terrorist methods, material temptations and corruption system Nurtured by tired down the country and the poorest people to facilitate their leadership.

Hence, the World Council for the Cedars Revolution believes that the choice of the Lebanese to put a finger on the wound and demand the implementation of the international resolution 1559, which ends the control of the factional weapon belonging to the Persian occupation, is the bottom line and everything that has become customary in the implementation of the demands of the Lebanese free from any external control or domination. Therefore, the Lebanese scene today looks as follows:

The first category, which the Lebanese see at home and abroad, represents their aspirations, which is the revolution that focuses on the implementation of international resolution 1559, and through it, Lebanon gets rid of the weapon of occupation and subordination that overwhelms its builders, and then free and normal elections can be held that produce a council that represents the people properly and then enjoys the support of the free world. all. This category is the hope of Lebanon, and it is the one who will win, because it is clear-cut and sincere in its proposals and does not maneuver for gains here and interests there.

The second category is the category of thugs who work under the guidance of the occupier and secure his interests by making mouths, exposure to the rebels, and confronting them in every square, sometimes covered by the forces run by the government.

And groups affiliated with the Iranian occupation party. To these people, we say no matter how much the enemy pays with money and support, its followers will not be saved from the wrath of the people, so do not let the Lebanese people follow you to your homes. Stop abolishing and leave for peace open, as days will turn on you and the occupier.

The third category is the Muqata's group, who dream of a role under the control of the occupation party and keep pace with it, and they want to replace those appointed by the party in the chairs, so they are trying to gain understanding of the street and depict the people's demands that they cannot be removed until the confrontation with the occupation. And these people abound in history with their proverbs, and we tell them they joined early in the ranks of the free revolutionaries and supported them in putting them before the revolution swept you away. There is no place for you not on the chairs in the settlements that you presented, or between the names of honorable people, whatever your history is full of "championships".

The World Council for the Cedars Revolution stands with all the free Lebanese in all parts of the earth and looks at their brothers today with pride because they truly represent the originality of a people who love life and sanctify freedom, and the torch will not fall, whatever the brutalists do. If tomorrow to its sight nearby.

WCCR Secretary General

Tom Harb
